Giovanni Tauro

Head of Product & R&D Engineer | IoT, Data & ML Products

Bari-Lecco, Italy +39 3279437161 giovanni.taurodi@gmail.com
LinkedIn GitHub Scholar Portfolio GrabCAD

Head of Product and co-founder of Rehabilia Technologies, with 5+ years of R&D at CNR-STIIMA. I own products end to end: framing ambiguous user and stakeholder needs, setting priorities and roadmaps, and delivering through prototypes, MVPs, and validation with real users. Hands-on with Python data analysis, embedded machine learning (TensorFlow Lite), and AI-assisted development.

Work Experience

Head of Product (Co-Founder), Rehabilia Technologies s.r.l., Milan
May 2023 – Present

- Own the product end to end, from problem discovery and user research to validation and delivery of rehabilitation technologies.
- Define product requirements and priorities by translating user needs, business goals, and stakeholder feedback into actionable roadmaps and iterative releases.
- Align engineering, design, and clinical stakeholders on product strategy and trade-offs.
- Validate product decisions through usability testing, interviews, and data: PhiCube reached SUS 85.8/100 with 19 children and is in two ongoing multicentric studies with 134 patients.

`Roadmap • Prioritisation • User Research • Stakeholder Communication • ASANA`

R&D Product Engineer, STIIMA, Lecco
Feb 2021 – Present

- Translated clinical requirements and user needs into 3+ functional prototypes across embedded electronics, wearable devices, and interactive systems, from concept to experimental validation.
- Defined hardware/software requirements with clinicians and deployed PhiCube devices in Italian clinics within Fit4MedRob (MUR, national programme).
- Defined the architecture of multimodal IoT feedback platforms, integrating wearable sensing, indoor localization, BLE communication, and adaptive audio, visual, and haptic feedback.
- Designed evaluation protocols and analysed usability, system performance, and user interaction data to guide design decisions.

`Python • Data Analysis • IoT • ESP32 • ROS2 • C++ • C# • Unity • Prototyping`

Selected Projects

OmniTrack: IoT-based Multimodal Navigation System /Frontiers

GIT_1
GIT_2
GIT_3

- Built end-to-end hardware/software prototypes, validated with 16 blind participants, integrating IoT-oriented sensing, processing, and user feedback into a complete system.
- Applied real-time data processing and system integration principles to transform physical-world signals into actionable information.

`Python • Data Anlysis • C++ • JS • Dashboard • ESP32 • ROS2 • BLE GATT • Sensors • I2C • Linux`

PhiCube: reconfigurable bilateral robotic device for neurorehabilitation /Frontiers

WEB

- Designed a modular rehabilitation device combining UX research, mechanical design, embedded systems, and multimodal interaction.
- Validated with 19 children (SUS 85.8/100); 134 patients in two on-going multicentric studies.

`UX • Interaction Design • CAD • Prototyping • Assembly • Usability`

RehaBalloon: Interactive Platform

GIT

- Prototyped a low-cost rehabilitation device in 24 hours during the LMU Munich "Hacking with Hardware" challenge, integrating pressure sensing, visual feedback, and embedded electronics.
- Implemented a TensorFlow Lite model on Arduino embedded machine learning classifier exercise patterns and record rehabilitation activity metrics in real time.

`Seeed Studio • Sensors • C++ • TensorFlow • Machine Learning`

Education

2023–27 **PhD, Mechanics and Advanced Engineering Sciences** *Bologna University, IT*

PhD Candidate, expected 2027. Topic: IoT-based Multimodal Navigation System – OmniTrack

- Research Mobility, Utrecht University, NLD: Sensory navigation and experimental psychology.
- Research Mobility, Toyo University, JP: Feedback algorithm and behaviour analysis.

2017–20 **MSc, Design & Engineering** *Politecnico di Milano, IT*

Topic: UX development of an ultrasonic dental device: from concept to validation: WashB

- Research Mobility, Chiba University, JP: UX research studies for Fujitsu and Panasonic.

2012–15 **BSc, Industrial Design** *Florence University, IT*

Topics: Foundation in research methodologies, development, and critical thinking.

Certifications

2026 **Claude 101 Badge — Claude Code Badge — Claude** *Anthropic, Online*

2024 **.ppt — Robotics and Allied Technologies for Rehab** *MUR, Rome, Italy*

Awards

2022–23 **EIT Health MedTech Bootcamp** and **EIT Wildcards Bootcamp**: selected by the European support programmes for innovative medical startups.

Patent

2023 Malosio, M., Nicora, M. L., Redaelli, D., Tauro, G. WO2023214349A1 *Device for bilateral rehabilitation*.
