Giovanni Tauro

Product Designer & Design Engineer | UX for Complex Systems

Bari-Lecco, Italy +39 3279437161 giovanni.taurodi@gmail.com
LinkedIn GitHub Scholar Portfolio GrabCAD

Product Designer and Design Engineer with 5+ years designing complex systems for expert users at CNR-STIIMA and as Head of Product of Rehabilia Technologies. I turn ambiguous, technical requirements into clear product logic and usable interfaces, from user research and flows to data-heavy dashboards that I can prototype in code (React, Python).

Work Experience

Head of Product (Co-Founder), Rehabilia Technologies s.r.l., Milan
May 2023 – Present

- Own product and UX end to end, from user research and problem discovery to validation and delivery of rehabilitation technologies.
- Design user workflows, interaction concepts, and functional prototypes by translating ambiguous requirements into usable product solutions.
- Align engineering, design, and clinical stakeholders on product logic, priorities, and trade-offs.
- Validate design decisions through usability testing and interviews: PhiCube reached SUS 85.8/100 with 19 children and is in two ongoing multicentric studies with 134 patients.

`UX Research • User Flows • Wireframing • Prototyping • Usability Testing • Figma`

R&D Product Engineer, STIIMA, Lecco
Feb 2021 – Present

- Designed the PhiCube user interface with Italian clinics to simplify hardware/software configuration, defining requirements through user-centred design (Fit4MedRob).
- Designed the user interface and a serious game for children with cerebral palsy (Giocabile).
- Defined the architecture of multimodal IoT platforms, mapping system states, feedback logic, and interactions across devices.
- Designed evaluation protocols, assessing usability, system performance, and user interaction through experimental testing.

`Interaction Design • Figma • Unity • Adobe CC • Python • C++ • Prototyping`

Selected Projects

GIT_1
GIT_2
GIT_3

OmniTrack: IoT-based Multimodal Navigation System /Frontiers

- Designed and built OmniAnalytics, a data-heavy web dashboard for researchers (React, FastAPI): session browsing, synchronized time-series charts, trajectory playback, comparison tables, and manual data-correction flows.
- Designed the end-to-end system and its audio and haptic feedback, validated with 16 blind participants.

`React • TypeScript • Python • FastAPI • Dashboard • ROS2 • ESP32 • Sensors`

PhiCube: reconfigurable bilateral robotic device for neurorehabilitation /Frontiers

- Designed a modular rehabilitation device combining UX research, mechanical design, embedded systems, and multimodal interaction.
- Validated with 19 children (SUS 85.8/100); 134 patients in two on-going multicentric studies.

`UX • Interaction Design • CAD • Prototyping • Assembly • Usability`

Education

2023–27 **PhD, Mechanics and Advanced Engineering Sciences** *Bologna University, IT*

PhD Candidate, expected 2027. Topic: IoT-based Multimodal Navigation System – OmniTrack

- Research Mobility, Utrecht University, NLD: Sensory navigation and experimental psychology.
- Research Mobility, Toyo University, JP: Feedback algorithm and behaviour analysis.

2017–20 **MSc, Design & Engineering** *Politecnico di Milano, IT*

Topic: UX development of an ultrasonic dental device: from concept to validation: WashB

- Research Mobility, Chiba University, JP: UX research studies for Fujitsu and Panasonic.

2012–15 **BSc, Industrial Design** *Florence University, IT*

Topics: Foundation in research methodologies, development, and critical thinking.

Skills

Design UX research, user flows, wireframing, prototyping, interaction design, usability testing, Figma, Adobe CC

Code React, JavaScript, Python, C++, C#, Unity, Git

Courses & Certifications

2026 **Claude 101 Badge — Claude Code Badge — Claude** *Anthropic, Online*

2023 **Sketching with Hardware: Prototyping Tangible AI** *LMU Munich, DE*

2022 **Experimental Interaction Design** *Tallinn University, EE*

Awards

2022–23 **EIT Health MedTech Bootcamp** and **EIT Wildcards Bootcamp**: selected by the European support programmes for innovative medical startups.

Patent

2023 Malosio, M., Nicora, M. L., Redaelli, D., Tauro, G. WO2023214349A1 *Device for bilateral rehabilitation*.
