Giovanni Tauro

Head of Product | Internal Tools, Data & Processes

Bari-Lecco, Italy +39 3279437161 giovanni.taurodi@gmail.com
LinkedIn GitHub Scholar Portfolio GrabCAD

Head of Product and co-founder of Rehabilia Technologies, with 5+ years of R&D at CNR-STIIMA in a regulated domain (medical devices). I map how work is actually done with the people who do it, turn scattered, undocumented knowledge into clear requirements and specs, and prioritise with data, working closely with developers from spec to release.

Work Experience

Head of Product (Co-Founder), Rehabilia Technologies s.r.l., Milan
May 2023 – Present

- Own the product from discovery to release: interview clinicians and users, map how the work is done today, and turn their needs into requirements and specs for engineering.
- Prioritise a backlog that is always larger than capacity, using study data and user feedback to decide what enters each release and to explain what waits.
- Align engineers, clinicians and research partners on trade-offs and follow each release through to validation: PhiCube reached SUS 85.8/100 with 19 children and is in two ongoing multicentric studies with 134 patients.

`Discovery` • `Requirements` • `Specs` • `Prioritisation` • `Stakeholder Alignment` • `Asana`

R&D Product Engineer, STIIMA, Lecco
Feb 2021 – Present

- Defined hardware/software requirements with clinicians and deployed PhiCube devices in Italian clinics within Fit4MedRob (MUR), under MDR, ISO 13485 and IEC 60601 constraints.
- Contributed to CE-oriented documentation (technical files, manuals, design dossiers), turning regulatory requirements into design inputs.
- Designed system architectures: data flows, communication protocols (BLE), databases (MongoDB) and integrations between devices and software.
- Designed evaluation protocols and analysed usage and performance data in Python to guide design decisions.

`Requirements` • `Regulated Domain` • `Data Modelling` • `MongoDB` • `Python` • `Git`

Selected Projects

GIT_1
GIT_2
GIT_3

OmniTrack / OmniAnalytics: internal data tool for a research team /Frontiers

- Designed OmniAnalytics, a data tool that turns raw session recordings from 16 blind participants into standard trial metrics: route similarity, speed and target discovery.
- Designed correction flows with full traceability: corrections, exclusions and annotations are stored separately, so raw records are never modified.

`Python` • `MongoDB` • `Data Model` • `Git`

PhiCube: reconfigurable bilateral robotic device for neurorehabilitation /Frontiers

- Took a medical device from user research to deployment in clinics, balancing user needs, engineering constraints and regulatory requirements; co-inventor on the patent.

WEB

`Requirements` • `Usability` • `Regulated Product` • `Patent`

Education

2023–27 **PhD, Mechanics and Advanced Engineering Sciences** *Bologna University, IT*

PhD Candidate, expected 2027. Topic: IoT-based Multimodal Navigation System – OmniTrack
- Research Mobility, Utrecht University, NLD: Sensory navigation and experimental psychology.
- Research Mobility, Toyo University, JP: Feedback algorithm and behaviour analysis.

2017–20 **MSc, Design & Engineering** *Politecnico di Milano, IT*

Topic: UX development of an ultrasonic dental device: from concept to validation: WashB
- Research Mobility, Chiba University, JP: UX research studies for Fujitsu and Panasonic.

2012–15 **BSc, Industrial Design** *Florence University, IT*

Topics: Foundation in research methodologies, development, and critical thinking.

Skills

Product	Discovery, interviews, process mapping, specs, prioritisation, roadmaps, Asana
Tech	Python (pandas), MongoDB, Git, Linux, C++
Regulated	MDR, ISO 13485, IEC 60601, CE technical documentation

Certifications

2026 **Claude 101 Badge — Claude Code Badge — Claude** *Anthropic, Online*

2024 **.ppt — Robotics and Allied Technologies for Rehab** *MUR, Rome, Italy*

Patent

2023 Malosio, M., Nicora, M. L., Redaelli, D., Tauro, G. WO2023214349A1 *Device for bilateral rehabilitation.*
