Product designer and Head of Product of Rehabilia Technologies, with 5+ years at CNR-STIIMA designing tools for expert users. I own features end to end: I frame fuzzy problems with no spec through interviews and data, decide what to build and why, and take it to flows, Figma prototypes and usability tests. I designed OmniAnalytics, a data-heavy dashboard for researchers, and I use Claude and Claude Code daily to build quick prototypes and test ideas against real outputs.

Work Experience

Head of Product (Co-Founder), Rehabilia Technologies s.r.l., Milan
May 2023 – Present

- Lead product and design in a small founding team: decide what to build and why, from customer discovery to flows, prototypes and delivery.
- Frame problems that arrive without a spec: field research with clinics and education centres on their pain points, tools and buying decisions, synthesised into journey maps and requirements.
- Turn findings into written proposals and roadmap priorities, and present them to engineering, clinical partners and support programmes (EIT Health, DOHE EdTech accelerator).
- Validate design decisions with usability tests: PhiCube reached SUS 85.8/100 with 19 children and is in two ongoing multicentric studies with 134 patients.

`Product Strategy • Discovery • Journey Mapping • Prototyping • Figma`

R&D Product Engineer, STIIMA, Lecco
Feb 2021 – Present

- Designed the PhiCube user interface with Italian clinics (Fit4MedRob), turning complex hardware and software configuration into clear flows for therapists.
- Mapped system states, feedback logic and interactions across devices for multimodal IoT platforms, so clinical and research teams could follow them.
- Designed accessible interfaces and a game for children with cerebral palsy (Giocabile), and co-authored research on socially interactive AI agents.
- Designed evaluation protocols and analysed usability and interaction data in Python (pandas, Jupyter) to drive design iterations.

`Interaction Design • Accessibility • Systems Mapping • Figma • Python`

Product Designer, Adidas, Remote
Oct 2020 – Jan 2021

- Developed product concepts from trend, competitor and user research (sketches, mood boards); defined materials and colours (Pantone) and produced 3D renders in Blender.

`Concept Design • Trend Research • CMF • Sketching • Blender`

Selected Projects

GIT_1
GIT_2
GIT_3

OmniTrack: IoT-based Multimodal Navigation System /Frontiers

- Designed OmniAnalytics, a data-heavy dashboard for researchers: session browsing, time-series charts, trajectory playback and data-correction flows that never alter raw records.
- Framed an open problem with no brief, indoor navigation for blind people, into an experience with audio and haptic feedback, tested with 16 blind participants.

`Dashboard Design` • `Data Visualisation` • `UX` • `Prototyping` • `User Testing`

WEB

PhiCube: reconfigurable bilateral robotic device for neurorehabilitation /Frontiers

- Took a modular rehabilitation device from user research and prototypes to clinical use.
- Validated with 19 children (SUS 85.8/100); 134 patients in two on-going multicentric studies.

`UX` • `Interaction Design` • `Prototyping` • `Usability` • `Patent`

Education

2023–27 **PhD, Mechanics and Advanced Engineering Sciences** *Bologna University, IT*

PhD Candidate, expected 2027. Topic: IoT-based Multimodal Navigation System – OmniTrack

- Research Mobility, Utrecht University, NLD: Sensory navigation and experimental psychology.
- Research Mobility, Toyo University, JP: Feedback algorithm and behaviour analysis.

2017–20 **MSc, Design & Engineering** *Politecnico di Milano, IT*

Topic: UX development of an ultrasonic dental device: from concept to validation: WashB

- Research Mobility, Chiba University, JP: UX research studies for Fujitsu and Panasonic.

2012–15 **BSc, Industrial Design** *Florence University, IT*

Topics: Foundation in research methodologies, development, and critical thinking.

Skills

Design	Product & interaction design, user flows, prototyping, dashboards, data viz, Figma
Research	Interviews, usability testing (SUS), journey mapping, synthesis, Python (pandas, Jupyter)
AI	Claude, Claude Code, AI-assisted prototyping, TensorFlow Lite, Adobe CC, Git

Courses & Certifications

2026 **Claude 101 Badge — Claude Code Badge — Claude** *Anthropic, Online*

2023 **Sketching with Hardware: Prototyping Tangible AI** *LMU Munich, DE*

2022 **Experimental Interaction Design** *Tallinn University, EE*

Selected Publication

2024 Arora, R., . . . , Tauro, G., . . . **Socially interactive agents for robotic neurorehabilitation training.** *Frontiers in Artificial Intelligence*. Link
