Head of Product and co-founder of Rehabilia Technologies, with 5+ years at CNR-STIIMA building products for expert users. I own the product from discovery to release: I turn ambiguous problems into scoped releases, prioritise with user feedback and study data, and work closely with engineers on trade-offs. I designed OmniAnalytics, a data tool for a research team, and I use Claude and Claude Code daily to prototype ideas and analyse data.

Work Experience

Head of Product (Co-Founder), Rehabilia Technologies s.r.l., Milan
May 2023 – Present

- Own the product from discovery to release: interview clinicians and users, map how the work is done today, and turn their needs into requirements and specs for engineering.
- Prioritise a backlog that is always larger than capacity, using study data and user feedback to decide what enters each release and to explain what waits.
- Align engineers, clinicians and research partners on trade-offs and follow each release through to validation: PhiCube reached SUS 85.8/100 with 19 children and is in two ongoing multicentric studies with 134 patients.

`Discovery • Requirements • Specs • Prioritisation • Stakeholder Alignment • Asana`

R&D Product Engineer, STIIMA, Lecco
Feb 2021 – Present

- Designed the PhiCube user interface with Italian clinics (Fit4MedRob), turning complex hardware and software configuration into clear flows for therapists.
- Worked with engineers on system design: data flows, BLE communication, MongoDB databases and integrations between devices and software.
- Designed evaluation protocols and analysed usage and performance data in Python (pandas, Jupyter) to decide the next iteration.
- Co-authored research on socially interactive AI agents for robotic rehabilitation (*Frontiers in Artificial Intelligence*, 2024).

`Requirements • UX • System Design • Python • MongoDB • Git`

Selected Projects

GIT_1
GIT_2
GIT_3

OmniTrack: IoT-based Multimodal Navigation System /Frontiers

- Designed OmniAnalytics, a data-heavy dashboard for researchers: session browsing, time-series charts, trajectory playback and data-correction flows that never alter raw records.
- Framed an open problem with no brief, indoor navigation for blind people, into an experience with audio and haptic feedback, tested with 16 blind participants.

`Dashboard Design` • `Data Visualisation` • `UX` • `Prototyping` • `User Testing`

WEB

PhiCube: reconfigurable bilateral robotic device for neurorehabilitation /Frontiers

- From user research and prototypes to clinical use: SUS 85.8/100 with 19 children.
- 6-clinic study, preliminary results: 55 children (4–17 years) rated every usability and acceptability item above 4/5; 70% saw it as a game, not therapy.

`UX` • `Interaction Design` • `Prototyping` • `Usability` • `Patent`

Education

2023–27 **PhD, Mechanics and Advanced Engineering Sciences** *Bologna University, IT*

PhD Candidate, expected 2027. Topic: IoT-based Multimodal Navigation System – OmniTrack

- Research Mobility, Utrecht University, NLD: Sensory navigation and experimental psychology.
- Research Mobility, Toyo University, JP: Feedback algorithm and behaviour analysis.

2017–20 **MSc, Design & Engineering** *Politecnico di Milano, IT*

Topic: UX development of an ultrasonic dental device: from concept to validation: WashB

- Research Mobility, Chiba University, JP: UX research studies for Fujitsu and Panasonic.

2012–15 **BSc, Industrial Design** *Florence University, IT*

Topics: Foundation in research methodologies, development, and critical thinking.

Skills

Product	Discovery, interviews, requirements, backlog prioritisation, roadmaps, Asana
UX	Usability testing (SUS), journey mapping, user flows, prototyping, Figma
Tech	Python (pandas, Jupyter), MongoDB, Git, Claude, Claude Code, TensorFlow Lite

Courses & Certifications

2026 **Claude 101 Badge — Claude Code Badge — Claude** *Anthropic, Online*

2023 **Sketching with Hardware: Prototyping Tangible AI** *LMU Munich, DE*

2022 **Experimental Interaction Design** *Tallinn University, EE*

Selected Publication

2024 Arora, R., . . . , Tauro, G., . . . **Socially interactive agents for robotic neurorehabilitation training.** *Frontiers in Artificial Intelligence*. Link
