Head of Product and co-founder of Rehabilia Technologies, with 5+ years of medical-device R&D at CNR-STIIMA. I took PhiCube, a patented rehabilitation device, from clinician interviews and requirements to deployment in Italian clinics and two multicentric studies, under MDR, ISO 13485 and IEC 60601. I set roadmaps and priorities from customer research and study data, and worked on our business plan in the EIT Health bootcamps. My product work started in dentistry: for my MSc thesis I designed WashB, an ultrasonic teeth-cleaning device.

Work Experience

Head of Product (Co-Founder), Rehabilia Technologies s.r.l., Milan
May 2023 – Present

- Own the product from discovery to release: interview clinicians and users, and turn clinical needs into requirements, a prioritised backlog and a milestone-based roadmap.
- Run field research with clinics and education centres on their pain points, the tools they use and how they make purchasing decisions.
- Align engineering, clinical and research partners on scope, timelines and trade-offs, and coordinate third-party suppliers.
- Worked on the business and financial plan in the EIT Health MedTech and EIT Wildcards bootcamps; present the product to clinicians, partners and support programmes.
- Validate decisions with usability tests and study data: PhiCube reached SUS 85.8/100 with 19 children and is in two ongoing multicentric studies with 134 patients.

`Roadmap` • `Requirements` • `Backlog` • `Customer Research` • `Business Plan` • `Asana`

R&D Product Engineer, STIIMA, Lecco
Feb 2021 – Present

- Defined hardware/software requirements with clinicians and deployed PhiCube devices in Italian clinics within Fit4MedRob (MUR), under MDR, ISO 13485 and IEC 60601 constraints.
- Contributed to CE-oriented documentation (technical files, manuals, design dossiers), turning regulatory requirements into design inputs.
- Took 3+ functional prototypes from concept to experimental validation, working with engineers on scope, trade-offs and technical feasibility.
- Designed evaluation protocols and analysed usage and performance data in Python to guide design decisions.

`Requirements` • `MDR` • `ISO 13485` • `IEC 60601` • `CE Documentation` • `Python`

Selected Projects

THESIS **WashB: ultrasonic teeth-cleaning device (MSc thesis, Politecnico di Milano)**

- Researched brushing, flossing, materials and users' oral-care habits, and identified ultrasound as a way to remove biofilm in hard-to-reach areas.
- Designed a device that works regardless of manual dexterity and adapts to different dental arch shapes; selected materials and optimised the shape of its functional components.

`Oral Care` • `User Research` • `Concept Design` • `Materials` • `Ultrasound`

WEB **PhiCube: reconfigurable bilateral robotic device for neurorehabilitation /Frontiers**

- Took a medical device from user research to deployment in clinics, balancing user needs, engineering constraints and regulatory requirements; co-inventor on the patent.
- Validated with 19 children (SUS 85.8/100); 134 patients in two ongoing multicentric studies.

`Requirements` • `Usability` • `Regulated Product` • `Clinical Studies` • `Patent`

Education

2023–27 **PhD, Mechanics and Advanced Engineering Sciences** *Bologna University, IT*

PhD Candidate, expected March 2027. Topic: IoT-based Multimodal Navigation – OmniTrack

- Research Mobility, Utrecht University, NLD: Sensory navigation and experimental psychology.
- Research Mobility, Toyo University, JP: Feedback algorithm and behaviour analysis.

2017–20 **MSc, Design & Engineering** *Politecnico di Milano, IT*

Topic: UX development of an ultrasonic dental device: from concept to validation: WashB

- Research Mobility, Chiba University, JP: UX research studies for Fujitsu and Panasonic.

2012–15 **BSc, Industrial Design** *Florence University, IT*

Topics: Foundation in research methodologies, development, and critical thinking.

Skills

Product Roadmaps, customer research, requirements, backlog prioritisation, business plans, Asana

Regulated MDR, ISO 13485, IEC 60601, CE technical documentation, usability evaluation

Data Study protocols, usability metrics (SUS), Python (pandas)

Awards

2022–23 **EIT Health MedTech Bootcamp** and **EIT Wildcards Bootcamp**: selected by the European support programmes for innovative medical startups.

Patent

2023 Malosio, M., Nicora, M. L., Redaelli, D., Tauro, G. WO2023214349A1 *Device for bilateral rehabilitation*.
